Land Economics is devoted to the study of economic aspects of the entire spectrum of natural and environmental resources, emphasizing conceptual and/or empirical work with direct relevance for public policy. Founded in 1925 as the Journal of Land and Public Utility Economics, the emphasis remains with articles that address the determinants and consequences of economic activity on the value and use of land, or the contribution of natural and environmental resources to economic activity.

Land Economics is published quarterly (February, May, August, November) by the University of Wisconsin Press. Land Economics is available online with value-added research tools, at no additional cost, to subscribers of the print version. Correspondence regarding subscriptions, requests for advertising rate cards, ordering back issues, and other business should be sent to: Journals Division, University of Wisconsin Press, 1930 Monroe Street, 3rd floor, Madison, WI 53711-2059, U.S.A., journals@uwpress.wisc.edu, uwpress.wisc.edu/journals/. Annual subscription rates for print and electronic are $450 for institutions and $130 for individuals; rates are $380 for only electronic for institutions and $105 for individuals (foreign postage is $40 a year additional; Canadian subscribers add 5% goods and services tax). Authorization to reproduce material from this journal, beyond one copy for personal use, or that permitted by Sections 107 and 108 of U.S. Copyright Law, is granted for a fee. For fee schedule and payment information, contact: www.copyright.com for the Copyright Clearance Center (CCC), 222 Rosewood Dr., Danvers, MA 01923; (978) 750-8400, Fax (978) 785-4470.

Postmaster: Send address changes to Land Economics, 1930 Monroe Street, 3rd Floor, Madison, WI 53711-2059.

Guidelines For Manuscript Submission

*Land Economics* requires that authors submit all manuscripts online. The link to our submissions site is http://le.msubmit.net.

As of January 1, 2018, *Land Economics* charges a submission fee of $100 to consider initial submissions. (No fee is charged for invited revisions.) This fee is nonrefundable and does not guarantee that your manuscript will be sent to outside reviewers; we reject over half of all manuscripts without sending them to outside reviewers. Researchers for whom the submission fee would cause a significant economic hardship may request a waiver.

Submissions should conform to the journal’s purpose: *Land Economics* is primarily interested in the policy implications of the work we publish, and therefore it is important that all papers have a strong empirical component. It is impossible to derive coherent policy conclusions from purely axiomatic models because such models lack connection to empirical reality. With that in mind, papers lacking empirical content are discouraged.

It is the policy of *Land Economics* to publish papers only on the condition that the data used in the analysis are clearly and precisely documented, readily available to any researcher for purposes of replication, and sufficiently detailed in the specifics of computations to permit replication. Appearance of an article in *Land Economics* constitutes evidence that authors understand these conditions and will abide by the stated requirements.
